1 Introduction

1.1 Purpose of this Document

The purpose of this document is to provide Trust Company Service Providers (“**TCSP**”) and technology providers with guidelines to complete the Jersey Financial Services Commission (“**JFSC**”) Registry API testing process, in order to gain access to the production level Registry API.

Within this document we refer to **API candidates**, which are TCSPs or technology providers that have requested to be assessed against the prescribed test scenarios on the Registry API test environment.

The intention is that API candidates will successfully complete a prescribed set of tests on the JFSC test environment to evidence that they have correctly interpreted and integrated with the API schemas and services. API candidates that successfully complete the test scenarios will be provided with access to submit data via the JFSC Registry API production environment.

It is recommended that you read the API Manual prior to reading this document. The API Manual is available here: [Registry API Manual](#)

1.2 Registry API Access

Access to the Registry API **production environment** is restricted to TCSPs. The security certificates and unique credentials that are required to access the JFSC Registry API production environment will be issued only to TCSP representatives.

In order to access the production level service, a TCSP will need to request access and accept the Registry API Terms of Use by submitting the Registry API application form. Please note that you may have already requested access, and agreed to the terms of Use when applying for myRegistry access in December 2020. The terms of Use are available here: [Registry API Terms of Use](#)

There are two levels of access to the Registry API channel.

Level	Description	Accessible Services
Level 1	API users can retrieve information on entities for which they are a nominated person. Other basic services are also available.	GetEntityInformation CheckName CheckSubmissionStatus GetCountries
Level 2	API users can update entities for which they are a nominated person	AmendAssociatedParty AmendShareCapital ChangeRegisteredOffice FileConfirmationStatment UploadAttachment

Upon completing the application form, you will automatically receive Level 1 access which will immediately allow you to retrieve live public and private information on the registered entities for which you are a nominated person.

In order to advance to Level 2, you will need to successfully complete a series of prescribed tests on the JFSC test environment before proceeding to the production environment.

A technology provider may wish to complete the test scenarios on the JFSC test environment to provide a level of assurance to their customers that their product is compatible with the JFSC Registry API.

The prescribed testing process is detailed within section 2 of this document.

1.3 Contact

Any questions or clarifications regarding this document should be directed to the JFSC via the **Registry API support mailbox** that is available at RegistryAPI@jerseyfsc.org.

2 Registry API Test Process

Prior to commencing the testing process, it is expected that API candidates have completed integration activities as per the JFSC Registry API Integration Guidelines (see the Registry API Manual as per above), and that the required Test **Client Certificate** and Test **Registry API Key** are in place.

The following list sets out the complete process:

1. Once the test Client Certificates and Registry API Key are installed, and development is complete, the applicant can notify the JFSC via the Registry API Support Mailbox and a pre-test meeting will be scheduled to walk-through the testing process. We will issue test windows on a first come, first served basis.
2. Your API Key is allocated permissions at a granular level to enable/disable access depending on the services you require to use and the test scenarios that you have successfully passed.
 - a. Level 1 services are enabled by default.
 - b. Level 2 services are individually enabled following the successful testing of the mandatory test scenarios for that service. You can request to only be tested against specific services if you want to integrate and access services on an iterative basis.
3. The applicant will be provided with a set of assigned test entities that must be used to submit the test scenario responses as set out within this document. Please note that this set of test entities will be separate to the test entities that are provided to API candidates to use during development, integration and ad-hoc testing activities.
4. The API candidate will prepare and submit each of the API Test Scenarios on the JFSC test environment via their test system. The API candidate must use the provided test entities to submit their test scenario responses.
5. The API candidate will then contact the JFSC via the Registry API support mailbox to confirm that the test scenarios have been submitted and should provide the submission numbers that have been returned by the Registry API test system. Within this communication, the candidate must declare that the submitted test scenarios were communicated to the JFSC test Registry API via their test system and that their test system provides a true representation of the production systems and data exchange that will be established between the TCSP and the JFSC.
6. The JFSC Registry team will evaluate each of the submitted applications and respond to the API candidate via email detailing the outcome of the test results. Upon successful completion of all test scenarios, the Registry team will respond to the API candidate with a confirmation that all tests are complete. We will work to respond with test results within 72 hours and will keep you informed of progress or issues at the earliest possible time. If the candidate is unsuccessful for any of the test scenarios, the JFSC will contact the candidate to provide feedback to support retesting.
7. Following the successful completion the test scenarios, the API candidate must confirm to the JFSC, via the Registry API Support Mailbox that they want to proceed with access to the JFSC Registry API production environment.
8. The JFSC ICT team will provide the API candidate (TCSPs Only) with a link to request a production level certificate (if one has not already been issued). The JFSC will also provide the

API candidate with a production level Registry API Key (if one has not already been issued). The JFSC will also enable any of the Level 2 services, based on the test scenarios that have been completed. The issuance process for the production level certificate and key, will follow the same process as undertaken for the issuance of the test certificate and key. Please refer to the JFSC Registry Integration Guidelines for further information.

9. The JFSC will work with the TCSP to coordinate and monitor the initial **'live'** submissions that are filed across the Registry API interface to support the transition to the production level environment.

At any stage during the above process, technical or business-related queries can be emailed to the **Registry API Support Mailbox**. Production level support should also be requested via the same mailbox.

3 API Test Scenarios

The JFSC have created a number of real-world test scenarios along with supporting test entity data that each API candidate must use to undertake controlled tests within the JFSC test environment. API submissions should be prepared and submitted to the JFSC and will be verified by the Registry team who will undertake integrity and compliance checks. The Registry will evaluate the received API submissions based upon your interpretation of the supplied test scenario data.

3.1 Test Environment Scenarios

The JFSC have provided 14 Test Scenarios within this document (see section 4).

Through correspondence with the JFSC team, via the Registry API Support Mailbox, you will have received a table containing 14 assigned Test companies for you to submit the specific test scenario responses.

For example:

Scenario	API Service	Entity Name	Entity Number
#1	ChangeRegisteredOffice	API Scenario 01	Scenario-12345601
#2	ChangeRegisteredOffice	API Scenario 02	Scenario-12345602
#3	AmendShareCapital	API Scenario 03	Scenario-12345603
...	...	...	...
#14	FileConfirmationStatement	API Scenario 14	Scenario-12345614

The 14 Test entities are reserved specifically for scenario testing with the JFSC, and you should only file the test scenarios responses against these entities when you are ready to be assessed by the JFSC.

In addition, the JFSC Team will provide you with a number of ad-hoc Test companies covering a variety of Entity Types to use as you wish for your own internal development and integration testing activities.

Each of the scenarios contain supporting and background information, some of which may be pertinent to the test submissions that you are required to file with the JFSC. An illustration is provided for each of the scenarios, the supporting legend should be interpreted as follows:

UNCHANGED	The details provided for this individual or entity have not changed since the last filing was submitted to the JFSC.
AMEND	The information of this individual or entity has changed since the last filing was submitted to the JFSC.
ADD	This individual or entity has been added to the control or ownership structure since the last filing was submitted to the JFSC.
REMOVE	This individual or entity has been removed from the control or ownership structure since the last filing was submitted to the JFSC.

4 TEST Environment Scenarios

4.1 Test Scenario No. 1 – Change Registered Office

The objective of this scenario is to change the Registered Office to the specified new address. You must use the test entity provided for Scenario 1.

Please use an effective date of [today's date].

Change Details

New Registered Office Address

First Floor,
IFC1,
Esplanade,
St Helier,
JE1 ABC,
JERSEY

[END TEST SCENARIO NO. 1]

4.2 Test Scenario No. 2 – Change Registered Office (Resubmission)

The objective is to change the Registered Office to the specified new address. The difference with this scenario is that Registry will return the original submission and request that you make amendments before re-submitting. Your objective is to demonstrate that you can interpret a submission that has been returned by the JFSC, can identify the return reason, make required amendments and file the correct updates. You must use the test entity provided for Scenario 2.

Please use an effective date of [today's date].

Change Details

New Registered Office Address

11 Blossom Apartments,
Blossom Avenue,
St. Helier,
JE1 XYZ,
JERSEY

Registry will 'Return' this submission.

To complete this scenario, you will need to:

- Review the returned reasons as provided by the Registry in the submission response.
- Correct the data based on Registry's response and resubmit the submission using the submission reference number returned in the submission response.

[END TEST SCENARIO NO. 2]

4.3 Test Scenario No. 3 – Amend Share Capital

(No Longer required to submit)

The objective of this scenario is to update the existing share capital structure for the test entity provided for Scenario 3.

The share structure is '**par value**'. You are not filing a special resolution to update the authorised share capital structure, rather you are informing the JFSC of the current authorised share structure.

This submission represents the use case of how you communicate the current authorised share capital structure to the JFSC, so that the entity can complete their first annual confirmation statement. The action of providing the current authorised share capital information needs to be completed once, as part of the transition to the new Law and new Registry system.

In order to complete this scenario, you will need to submit the following information:

Change Type	Share Class	Change Details
AMEND	Class A	Liability: Limited Number of Shares: 20,000 Currency: GBP Authorised Capital: 20,000

[END TEST SCENARIO NO. 3]

4.4 Test Scenario No. 4 – Amend Share Capital (Special Resolution)

The objective of this scenario is to update the share capital structure for the test entity provided for Scenario 4, by submitting the new authorised share capital data and the supporting special resolution.

The share structure is of type '**no par value**'. This scenario represents the submission of a special resolution. Three share classes already exist within the provided test entity (Class A, Class B and Class C).

To complete this scenario, you will need to:

- Upload a symbolic special resolution attachment – you can upload a one page PDF attachment that contains the following text 'Test Scenario 4 – special resolution'.
- Add a new class and amend the existing share classes with the information provided below.

Change Type	Share Class	Change Details
AMEND	Class A	Number of Shares: 100,000
UNCHANGED	Class B	
REMOVE	Class C	
ADD	Class D	Liability: Unlimited Unrestricted: Yes Class of Share: Class D

[END TEST SCENARIO NO. 4]

4.5 Test Scenario No. 5 – Amend Associated Party (Company)

The objective of this scenario is to update the roles and details of the associated parties with the specified information for the test entity provided for Scenario 5.

The existing authorised share capital of the test entity is '**par value**' and consists of 10,000 Ordinary shares with a par value of £1.00 (GBP).

Associated Party Individuals

Three individuals are currently linked to the test entity as associated parties. You are required to update the parties as follows.

1. Amy Andrews

Amy Andrews is currently a Beneficial Owner and Director.

She has changed her surname to 'Smith' following her marriage to Terry Smith.

She resigned as a Director on [use today's date].

She has become a Member on [use today's date] of the company with 33% ownership, holding the shares as a nominee for her husband.

2. Beth Brown

Beth Brown is a Controller.

3. Conor Clarke

Conor Clarke is a Beneficial Owner and Member. He has sold his 45% shares in the company to Douglas Derek Dow-Jones.

Terry Smith

Terry Smith will be a new Beneficial Owner.

Douglas Derek Dow-Jones

Douglas Derek Dow-Jones will be a new Beneficial Owner, Director and Member. He wants to make an application under Regulation 4 to make his details unavailable for public inspection.

Associated Party Entities

Two Entity associated parties already exist.

1. Active Architecture Limited

Active Architecture Limited own 10% of the shares. They have changed their registered office address.

2. Colourful Creations Limited

Colourful Creations Limited held 12% of the shares of 'API Scenario 5' company. It has sold its shares to Dynamic Discoveries Limited.

Beautiful Minds Limited

Beautiful Minds Limited will be a new corporate Director.

Change Type	Individual	Change Details

[END TEST SCENARIO NO. 5]

4.6 Test Scenario No. 6 – Amend Associated Party (Company)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 6.

Mr Bob McCluskey is a Beneficial Owner, Controller and Member. Bob currently holds 5,000 Class A shares which makes up 100% of the company's issued shares. Bob McCluskey has sold all of his shares to Mr Larry & Mrs Jemima Costello who hold them jointly.

REMOVE	Bob McCluskey	
ADD	Larry Costello Jemima Costello	<u>Larry Costello</u> • Roles: Beneficial Owner, Controller, Member, and Director ◦ Start Dates: [today's date] • Residential Address: ◦ Beauport View, St Brelade, Jersey, JE3 7YT • Gender: Male • Place of birth: Liverpool, England • DOB: 2 August 1945 • Occupation: Writer • Nationality: British • Correspondence address: same as residential • Shares: ◦ Class: Class A ◦ Number of shares: 5,000 ◦ Guarantor Member: Yes ◦ Joint Ownership Details: Jointly held with Jemima Costello (Beauport View, St Brelade, Jersey, JE3 7YT) <u>Jemima Costello</u> • Roles: Beneficial Owner, Controller, Director and Secretary ◦ Start Dates: [today's date] • Residential Address: ◦ Beauport View, St Brelade, Jersey, JE3 7YT • Gender: Female • Place of birth: Manama, Bahrain • DOB: 1 November 1997 • Occupation: Model • Nationality: French • Correspondence address: Same as residential

[END TEST SCENARIO NO. 6]

4.7 Test Scenario No. 7 – Amend Associated Party (Limited Partnership)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 7.

The general partner of the 'API Scenario 7' LP is Beta GP LLC (Delaware). The GP is not registered with the JFSC under the FSJL, so we require the details of the controlling individuals. The controllers of the GP are as follows:

1. Nathan Wormside
2. Betty Anchor
3. Griselda Jones
4. Dr Michael Milkyway

Griselda Jones has changed her surname back to her maiden name and changed residential address.

Dr Michael Milkyway has been removed as a controller as he has been convicted of false accounting and is serving a prison sentence.

Mr Paul Pluto has joined the board of Beta GP LLC to replace Dr Milkyway and is to be added as a controller.

Change Type	Individual/Entity	Change Details
REMOVE	Dr Michael Milkyway	Date: [today's date]
UNCHANGED	Mr Nathan Wormside Beta GP LLC Betty Anchor	
AMEND	Ms Griselda Jones	- New Name: Griselda Potter - New Residential Address: 44 Savile Row, London W1S 3PB
ADD	Mr Paul Pluto	- Role: Controller - Start Date: [today's date] - Residential Address: 7, 22nd Floor, Flatiron Building, 175 5th Avenue, Manhattan, NY 10010 - Gender: Male - Place of Birth: Liverpool, England - DOB: 30 June 1976 - Occupation: Finance Director - Nationality: British - Correspondence address: - Same as R/O of API Scenario 7 LP - Date: [today's date]

[END TEST SCENARIO NO. 7]

4.8 Test Scenario No. 8 – Amend Associated Party (Foundation)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 8.

Two of the controllers of the test foundation are being removed:

- Qualifying Member – ABC QM Limited
- Council member - Mrs Georgina Ganymede

Barry Banjo, is a Council Member and is unchanged.

A new Qualified Member is being added, XYZ QM Limited, who are a Jersey company registered under FSJL with an 'OA' licence category.

Change Type	Individual/Entity	Change Details
REMOVE	ABC QM Limited Mrs Georgina Ganymede	End Date: [today's date]
ADD	XYZ QM Limited	• Registration Date: [today's date] • Jersey Registered: Yes • Jersey Regulated: Yes • Type: Registered Private Company • Number: scenario-8a • R/O Address: 600 Bond Street, St Helier, JE2 5MM • Roles: ○ Add role of Qualified Member & Controller ○ Start Date: [today's date]
UNCHANGED	Barry Banjo	

[END TEST SCENARIO NO. 8]

4.9 Test Scenario No. 9 – Amend Associated Party (Limited Liability Partnership)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 9.

Mr Monty Monroe, a Partner participating in the management of the LLP, has changed residential address.

Miss Nancy Fonpoy-Astaire, is a Partner who now participates in the management of the LLP.

Mrs Mandy Biggins, a Secretary and Partner, has changed residential address.

Change Type	Individual/Entity	Change Details
AMEND	Monty Monroe	- New Residential Address: - Villa Framboise, 2 Avenue Saint-Laurent, 9800 Monaco
ADD	Nancy Fonpoy-Astaire	- Roles: Beneficial Owner & Controller - Start Date: [today's date] - Residential Address: - Petit-Beurre Cottage, Swinbrook, Oxfordshire, OX18 4DY - Correspondence Address: - Use same R/O of LLP for Scenario 9 - DOB: 11 Nov 1977 - Gender: Female - Nationality: British - Born: London, UK - Occupation: Lawyer
AMEND	Mandy Biggins	- New Residential Address: - Elm Cottage, Richard Avenue, Grouville, JE9 4AH

[END TEST SCENARIO NO. 9]

4.10 Test Scenario No. 10 – Amend Associated Party (Trustee)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 10.

A Trust structure exists.

The Trustees are Mrs Indira Qatar and Mr Pablo Quilmes.

Mrs Qatar is a controller and retires as Trustee. Supercorp Trustees (Jersey) Ltd, registered with the JFSC under FSJL with an “L” licence, is appointed as a new Trustee.

Mr Pablo Quilmes is a controller and has moved from London to Lima.

Change Type	Individual/Entity	Change Details
REMOVE	Mrs Indira Qatar	End Date: [today’s date]
AMEND	Mr Pablo Quilmes	- New Residential Address: 808 Apartamento de Cinco Alpacas, Calle Oro, Lima, Peru ZZ0093
ADD	Supercorp Trustees (Jersey) Ltd	- Role: Controller - Start Date: [today’s date] - Registered number: scenario-10 - Jersey Registered: Yes - Jersey Regulated: Yes - Type: Registered Private Company - R/O Address: 100 Bath Street, St.Helier, JE2 5MM, Jersey

[END TEST SCENARIO NO. 10]

4.11 Test Scenario No. 11 – Amend Associated Party (State owned entity)

The objective of this scenario is to update the associated parties with the specified information for the test entity provided for Scenario 11.

An organisation has undergone a restructure. The beneficial ownership was previously held in a Trust structure. It is now held by the States of Jersey Government where Mr John Dunkirk is Head of Property Holdings.

The States of Jersey Government is state owned and therefore is not listed as a company on the JFSC companies Register. The details of the required amendments are provided in the below table.

Change Type	Individual/Entity	Change Details
REMOVE	Anna Maria Atlas - BO Thomas Thalassa - BO Alan Alpha Gruis - Controller Christopher Ipuppis - Controller 123 Trustees (Jersey) Ltd - Controller 12 Trustees (Guernsey) Ltd - Controller	End Dates: [today's date]
